Amendments To The Specification:

Please amend the paragraph beginning on page 1, line 5 as follows:

The present invention relates to a turbine, in particular a gas turbine for generating energy by burning a fuel/air mixture to produce a hot gas~~, according to the precharacterizing clause of Claim 1~~.

Please delete the paragraph beginning on page 1, line 26 through line 28 in its entirety.

Please delete the paragraph beginning on page 4, line 1 through line 4 in its entirety.

Please amend the paragraph beginning on page 6, line 10 as follows:

Fig. 2 shows a sector-shaped section of the turbine disc 16~~ which forms a coaxial shaft chamfer 17~~. The moving blade retaining groove 18 formed in the radial direction is fir-tree-shaped in cross-section and runs transverse to the outer perimeter. Moving blades can be slotted into the moving blade retaining grooves 18. For this purpose, the moving blades have a foot 19 corresponding to the moving blade retaining groove 18.
